Chenyu Gao

+1 (667) 910-5300 | chenyu.gao@vanderbilt.edu | chenyugoal.github.io

Professional Skills

- Areas of Expertise: Computer Vision, Generative Models, Natural Language Processing, Medical Image Analysis
- Languages: Python, Bash
- Frameworks & Libraries: PyTorch, TensorFlow, pandas/polars, multiprocessing
- Developer Tools: Singularity, Git, HPC/Slurm

Intellectual Property

IP1. **Chenyu Gao**, Bennett A. Landman, Michael E. Kim. 2024. System and Method of Brain Age Identification for Predicting Neuro-Degenerative Disease. U.S. Patent 63/701,861, filed Oct 1, 2024. Provisional patent.

Experience

Data Science and Machine Learning Intern June 2025 – Aug 2025
insitro *South San Francisco, CA*

- Designed a framework for multimodal self-supervised representation learning to enable the discovery of novel gene targets. First-authored a technical paper (pending internal review).

Multi-Modality Representation Learning and Uncertainty Inference July 2022 – Present
Vanderbilt University, Research Assistant *Nashville, TN*

- Designed a brain age estimation system which enables early detection of neurodegenerative diseases. [GitHub]
- Developed conditional generative adversarial network (cGAN) for field-of-view extension of diffusion MRI.
- Designed a red team model to simulate privacy attacks on defaced MRI images: reconstructing 3D high-resolution MRI images with high-fidelity human faces with cascaded diffusion models. [Blog]
- Characterized the heteroscedasticity of uncertainty in diffusion tensor imaging (DTI) of aging brains.

Building the World's Largest Diffusion and Structural MRI Database July 2022 – Present
Vanderbilt University, Research Assistant *Nashville, TN*

- Coordinated the collection and processing of 40+ MRI datasets, encompassing 30,000+ participants.
- Cleaned, organized, and harmonized tabular data from 100,000+ scans using pandas.
- Implemented containerization of pipelines with Singularity to ensure reproducibility and scalability.
- Utilized local and high-performance computing (HPC) resources for high-throughput parallel processing.
- Developed strategies for quality assurance of over 1M of image samples in real-time collaboration.

Medical Image Analysis and MRI Defacing Dec 2020 – May 2022
Johns Hopkins University, Research Assistant *Baltimore, MD*

- Implemented classical image processing algorithms and deep learning-based methods for registration, segmentation, and synthesis of MR images.
- Evaluated the effects of defacing whole-head MRI on segmentation reproducibility.

ProgLearn: Omnidirectional Transfer for Quasilinear Lifelong Learning Aug 2020 – May 2021
Johns Hopkins University, Research Assistant *Baltimore, MD*

- Extended the application of a lifelong learning algorithm (ProgLearn) from vision to speech. Validated and benchmarked the backward and forward knowledge transfer against transfer learning. [GitHub]

Education

Vanderbilt University — July 2022 – Dec 2026 (expected)
Doctor of Philosophy in Electrical & Computer Engineering — *Nashville, TN*

- Honors: Graduate School Travel Grant (2023), ECE Day best poster (2025)

Johns Hopkins University — Aug 2020 – May 2022
Master of Science in Biomedical Engineering — *Baltimore, MD*

Sun Yat-sen University — Aug 2016 – June 2020
Bachelor of Science in Biomedical Engineering — *Guangzhou, China*
